## Projects Done

- ***Network Ethical Hacking***

The project is, in essence, a remote response system which allows users to monitor the services not only on the machine where it is running, but anywhere on the Internet/ Intranet and in a wide variety of machines. The project allows users to access the services that are monitored with no loss of time. The project is developed under the environment C#.Net in Visual Studio .net as Front-end.

**Faculty Guide: Ms.M. Kavitha, Asst. Professor, Dept. of MCA, KCT**  
Technologies and languages used: C#
