As a **Research Analyst (May 25th 2009 to August 2012)**

Major Responsibilities:

- Analysis of Financial reports of the companies (Press Releases, 10Ks and 10Qs, etc.) and updating the key information provided in Income Statement, Balance Sheet, Cash Flow statements.
- Analysis of Extra ordinary items to know the impact of it on the EPS by which end user can easily know the root cause of increase/decrease of profit/loss of a company in the present quarter when compared to its previous quarter. If the reason for this is that company has incurred any extraordinary gain or loss then that should be adjusted to EPS to get NON-GAAP EPS.
- Calculating the “Special Items” like Profit/Loss on sale of Asset, Discontinuing charges, Restructuring charges and Onetime charges. And adding/deducting them from EPS to understand the Investors what is the exact profits of a company. By that Investors can know what are the Special items or Onetime charges has been incurred for a particular Quarter or Annual and how they affected the profits of a company.
- Preparing Secondary Research reports on Industry Trends, Competitor’s Analysis for the Third Parties
- Collecting financial data using on-line and other data sources.
- Revenue segmentation Region wise and product wise analysis.
- Writing methodology documents for the production team as per the client requirement.
- Achieving team tasks with in time as per the schedule and maintaining timeliness for the live press releases.

Technical work Experience:-

- Done testing on production tool and found out BUGS & REGS
- Given few tool enhancements where we can increase production and given few quality tips where we can increase quality.
- Identifies and implements process improvement initiatives.
- Leverage existing or propose new automation tools, techniques, and methodologies in order to provide deeper, faster, and more consistent outcome.

Awards and Appreciations:

- ✓ Received ‘**FACTSET STAR**’ Award for outstanding performance in Q4 2011. (Reward and Recognition Program).
- ✓ Appreciated on Analysed the quality assurance system and made recommendation for improvements. These were incorporated into the current quality assurance system.
- ✓ Created Process Docs/Knowledge Docs, Standard Questionnaire,etc that helped to save process time and increase productivity.
