### **LANGUAGES**

English, Malayalam, Hindi

### **PROJECT**

Designed and developed a Website for Kerala State Homeopathic Co-operative Pharmacy Ltd (HOMCO) providing its online marketing of its products as a part of my B.Com (Computer Applications) course.

### **PROJECT SUMMARY**

Project : ONLINE MARKETING SYSTEM  
 Client : HOMCO (Kerala State Homoeopathic Co-operative Pharmacy Ltd)  
 Technologies Used: Active Server Page (ASP) as Front-end & Oracle as Back-end.  
 Duration : 2 months.

### **ROLES AND RESPONSIBILITIES**

Before creating the website, the only way for a customer to contact the company is to visit the company directly or by post. By doing this, a customer gets the information's relating to the products available, price, terms and conditions etc. Then he/she have to fill an order form issued by the firm. In this system there arise so many problems i.e., lots of clerical work, more travelling and postal charges, time consuming etc.

After the implementation of the website, a customer makes orders without contacting the company directly. By viewing the site a customer gets all the necessary information's relating with the product and places the order from anywhere the world. From this system the customer can save the travelling time free from postal delays, easy awareness about the company and easy interaction in between the customer and the company so as to make dealings more secure and reliable.
