Operating system	Windows XP/7, Linux
Programming Languages	C,C++, VB, VB.net, COREJAVA, HTML
Databases	Ms Access, Oracle, MYSQL

1. Project Title : **"DSR Management System"**
 Front End : **Visual Basic 6.0**
 Back End : **MS Access**

Description:

The proposed system is designed by taking into consideration the all limitations of the manual system. The existing manual system has many requirements suggested by the user. It is designed in such a way that it can hold all the information that the user needed for the data processing and to generate various reports as per the requisition.

2. Project Title : **"PlayX-treem.com"**
 Front End : **VB.NET 2008**
 Back End : **MS Access**

Description:

PlayXtreem.com is a website containing small flash games for downloads. Here we have created the webpage so attractive so that people visit our website and download the games. We have kept available. Also, we have put a car racing game which we have developed using Macromedia Flash Maker.

3. Project Title : **"Steganography"**
 (The new technique of hiding data in the form of image)
 Front End : **.NET 2010 in C#**

Description:

One of the reasons that intruders can be successful is the most of the information they acquire from a system is in a form that they can read and comprehend. Intruders may reveal the information to others, modify it to misrepresent an individual or organization, or use it to launch an attack. One solution to this problem is, through the use of steganography. Steganography is a technique of hiding information in digital media. In contrast to cryptography, it is not to keep others from knowing the hidden information but it is to keep others from thinking that the information even exists.
